YOLOv8x	640	53.9	479.1	3.53	68.2	257.8

There are five models in each category of YOLOv8 models for detection, segmentation, and classification. YOLOv8 Nano is the fastest and smallest, while YOLOv8 Extra Large (YOLOv8x) is the most accurate yet the slowest among them.

Hands on

- **Predict with pretrain model by CLI and Python API**
- **Train on Custom Data**
- **Predict with new models**
